

What did you discover in Maths today?

What was something new that you learned?

When would you use that skill/concept again?

What advice would you give to another student when completing this task?

Talk about a strategy you used today which helped you? Why?

What was something that interested you today?

When would you use this skill again?

What would you do next time?

Explain your thinking today.

How can you show me what you think is correct?

What did you do today that was different/the same?

What is the best way to record your results? Why?

Can you show me another way of doing this?

What would you like to do next?

What helped you in your learning today?

How do you feel in maths sessions at the moment?
